

Dataset :- It's a Palmer Penguins from Kaggle. It's a classification dataset with 3 species and exactly 4 neural numerical features, so it fits our 4-2-3 neural network.

Input layer $\rightarrow$ 4 neurons

$$X = [39.1, 18.7, 181, 3750]$$

$$x_1 = \text{Bill/culmen length}$$

$$x_2 = \text{Bill/culmen depth}$$

$$x_3 = \text{Flipper length}$$

$$x_4 = \text{Body Mass.}$$

Output layer $\rightarrow$ 3 neurons.
